# The March to Composable

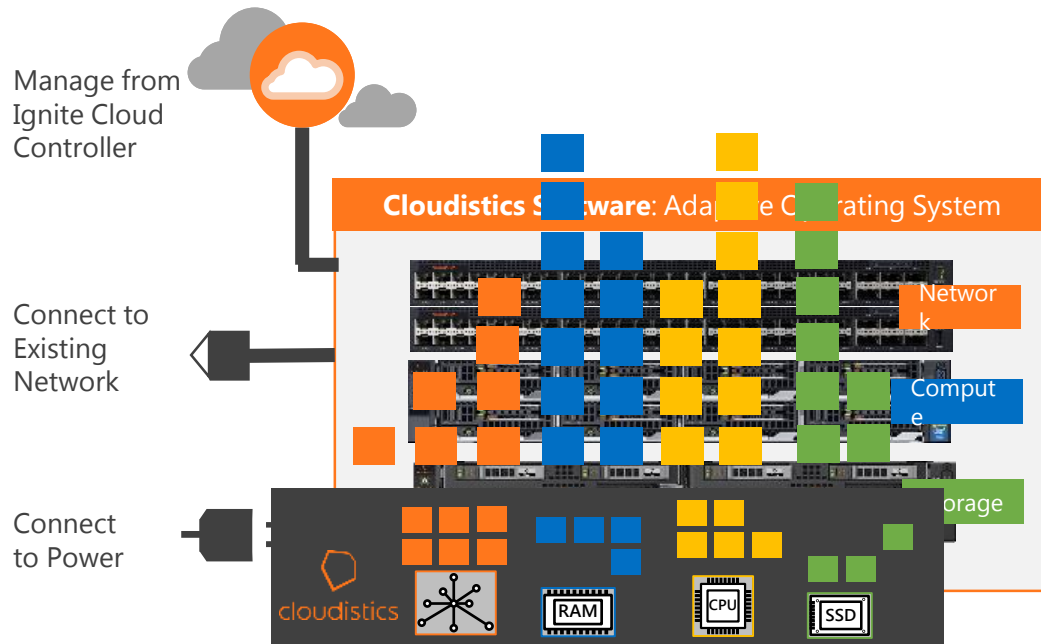

# What Makes A Platform Composable?

**Composable = Automated Infrastructure Without the Hassle of Managing Hardware**

# A Complete Composable Cloud Platform

The only all-inclusive cloud platform

**Fully integrated hardware and all software**

**Software Defined Everything**

**Independent scaling** on-demand, without disruption

**Federated resource pools** no interaction with hardware

**Micro-segmentation** segmented, shared resources

**SaaS-oriented Management** single pane, self-service interface

**Self-updating/healing** lights out platform control

# Cloud On-Prem

## Salient Cloud Characteristics

Self Service
